Visiting Health Teams outreach into the community and residential care setting to provide health promotion programmes for the elderly and their carers in collaboration with other elderly services providers. The aim is to increase their health awareness, self-care ability, and to enhance the quality of caregiving. An integrated and holistic approach is adopted in the “Improvement Project for Private Residential Care Homes”, which targets programmes at the specific training needs of caregivers in the homes, such as basic nursing skills. In 2007, Visiting Health Teams made 270 440 client-contacts.
