- (i) *衛生署醫護機構註冊辦事處*
  - 私家醫院、護養院、註冊診療所及豁免診療所的名單

  - (vi) *香港電話簿和電話查詢*
    - 其他可能聘有醫療護理人員的機構名單

1.3 The survey frame established from the above sources was cross-checked with that of the 2000 HMS and through telephone contact with the institution to identify any inconsistencies.

1.3 從上述各資料來源制定而成的統計調查框與 2000 年的統計調查框已予覆核，以及透過電話聯絡有關機構，以找出不一致之處。

1.4 As some organisations might exist in more than one source listed above, a computerised frame was established to check and remove duplicated records.

1.4 由於預計有些機構可能在超過一個上述資料來源出現，因此制定電腦化框檢查並刪除重複的記錄。

1.5 The 2005 HMS aimed to cover the healthcare personnel practising in Hong Kong. As it was impossible to obtain such a name list, the unit of enumeration was confined to institution. A total of 8 259 institutions in which healthcare personnel were likely to be employed were covered in 2005 HMS. They were classified as below:

1.5 2005 年醫療衛生服務人力統計調查的涵蓋範圍依照上次統計調查，以所有在香港執業的醫療護理人員為調查對象，但由於無法取得這樣的名單，點算單位只限於機構。2005 年醫療衛生服務人力統計調查涵蓋共 8 259 間可能聘用醫療護理人員的機構，其分類如下：

## II. Results of Enumeration by Type of Institutions

2.1 As only headquarters of the institutions were covered in the survey, the number of institutions covered in the 2005 HMS was 8 526. If the institution's headquarters could provide the information for their branches/sub-offices, only one questionnaire was sent to the headquarters. As the counting rule of institutions covered in the 2005 HMS is different from those of previous surveys, the figures on institutions covered in the 2005 HMS are not strictly comparable to the previous ones.

2.2 Of the 10 098 questionnaires sent to the institutions by which healthcare personnel are likely to be employed, 823 (8.2%) institutions were found to have residential address or invalid office telephone numbers, 634 (6.3%) institutions were found to have been demolished / moved / closed and 382 (3.8%) institutions were found to be duplicated with other institutions covered.

2.3 Of the remaining 8 259 institutions covered, 7 759 had responded to the survey, giving an overall response rate of 93.9% as shown below:

## II. 按機構類型劃分的點算結果

2.1 由於是次統計調查只涵蓋有關機構的總部，2005 年醫療衛生服務人力統計調查涵蓋的機構數目是 8 526。如機構總部能提供其分公司/分行的有關資料，衛生署只會向其總部發出一張問卷。因此，2005 年醫療衛生服務人力統計調查的點算機構數目方法與之前的統計調查有所不同，有關 2005 年醫療衛生服務人力統計調查涵蓋的機構數目不宜與以往的統計調查直接比較。

2.2 在發出 10 098 張問卷給可能聘有醫療護理人員的機構中，其中 823 (8.2%) 間機構位址為住宅位址或沒有有效商業電話號碼，634 (6.3%) 間機構被發現為已拆卸、搬遷或關閉及 382 (3.8%) 間機構被發現與其他涵蓋的機構重覆。

2.3 在統計調查所涵蓋餘下的 8 259 間機構中，7 759 間作出回應，整體回應率為 93.9% 如下所示：

		<i>2005 HMS</i>
<b>Number covered</b>	<b>涵蓋數目 (a)</b>	<b>8 259</b>
<i>Number not responded</i>	<i>沒有回應數目</i>	<i>500</i>
Non-contact within three attempts	經 3 次嘗試仍聯絡不上	400
Refusal	拒絕回應	100
<b>Number responded</b>	<b>回應數目 (b)</b>	<b>7 759</b>
With healthcare personnel employed	聘用醫療護理人員	6 905
Without healthcare personnel employed	沒有聘用醫療護理人員	854
<b>Overall response rate</b>	<b>整體回應率 (c)=(b)/(a)</b>	<b>93.9%</b>

2.4 Among the 7 759 responding institutions, 89.0% were found to employ healthcare personnel whilst 11.0% did not employ any such healthcare personnel at all (Chart A).

2.4 在 7 759 回應機構中，被發現聘用醫療護理人員機構佔 89.0%，而沒有聘用醫療護理人員機構佔 11.0% (圖甲)。
